Sahil Mukesh Deo

B.Tech, Computer Science and Engineering
Indian Institute of Technology Bombay
Expected graduation: May 2029

Ph: +91-7498046893
Email: 25b0991@iitb.ac.in
Email: sahildeo54@gmail.com
LinkedIn: sahil-mukesh-deo
GitHub: Sahil-M-Deo
Codeforces: Sahil_Deo

Examination	Institute	Year	CPI/%
Graduation	Indian Institute of Technology Bombay	2025 – present	9.68
Intermediate	Narayana e-Techno School	2025	96.8%
Matriculation	Wisdom High International School	2023	99.2%

Pursuing a **Minor** in **Statistics**

Scholastic Achievements

- Secured **All India Rank 7** in **JEE Advanced** among 180,000+ candidates *2025*
- Received the **Institute Academic Award** for securing **Rank 25** among 1,360 students by CPI *2026*
- Secured **Department Rank 15** among 200 students in CSE, IIT Bombay, by CPI *2026*
- Achieved **All India Rank 102** in **JEE Main** among 1,400,000+ candidates *2025*
- Awarded the **Gold Medal** in the **Homi Bhabha Balvaidnyanik Competition** *2019-20*
- Secured **State Rank 5** in the **Maharashtra Scholarship Exam** among 200,000+ students *2018-19*
- Shortlisted for the **Aditya Birla Scholarship** interview *2026*

Competitions & Olympiads

- Among the **top 600** of 10,000+ participants to reach the in-person regionals of **IICPC QuantFest**, and secured **Rank 227** of 600 at the regionals *2026*
- Rated **1654** on Codeforces (competitive programming) *2026*
- Among the **top 300** of 40,000+ candidates in the National Standard Examination in Physics (NSEP), selected for the **Indian National Physics Olympiad (INPhO)**, HBCSE *2024-25*
- Cleared the National Standard Examination in Astronomy (NSEA) among 40,000+ candidates to qualify for the **Indian National Astronomy Olympiad (INAO)**, HBCSE *2024-25*
- Cleared the National Standard Examination in Chemistry (NSEC) among 40,000+ candidates to qualify for the **Indian National Chemistry Olympiad (INChO)**, HBCSE *2024-25*
- Secured **1st position** in **Physics Bazinga**, Maths & Physics Club, IIT Bombay *2025*
- Secured **1st position** in **Maths Bazinga**, Maths & Physics Club, IIT Bombay *2025*
- **3rd** in the quizzing round of **The Graviton Crucible**, IIT Bombay Edition *2026*

Professional Experience

First-Year Trading and Technology Program (FTTP) | *Jane Street* *(2026)*
Hong Kong

- Shortlisted for **Jane Street's** selective program for first-year STEM undergraduates
- Attended classes on **trading and technology** and competed in a **team-based mock trading simulation**
- Developed **fair-value estimates** for a complex **live market simulation** with market inefficiencies

Key Projects

Randomised Algorithms: A 137-Page Book | *Summer of Science* *(2026)*
Maths and Physics Club, IIT Bombay *GitHub: Sahil-M-Deo/Randomised-Algorithms*

- Authored a self-contained **137-page, 13-chapter book** in LaTeX with **6 appendices** and **original problem sets**, covering **RP, ZPP & BPP**, **universal hashing**, **Freivalds' algorithm**, **Miller–Rabin**, **Pollard's rho**, streaming (**HyperLogLog**) and **derandomisation**
- **Conjectured** from simulation (exhaustive for small n, **Monte Carlo** for large n) that the **5-cycle is the worst case** for randomised **max-cut**, which would cut its expected time from $\Theta(nm)$ to $\Theta(n+m)$

- Proved via a **rank argument** that n pairwise-independent bits need $\geq \log_2(n+1)$ truly random bits, tight for the **XOR construction**; showed with **10,000-trial Monte Carlo** runs that the **union bound** is near-tight in practice

Deep Chess | *Seasons of Code*
Web and Coding Club, IIT Bombay

- Built a C++ chess engine rated **2200**, benchmarked against **Stockfish**: **alpha-beta** with iterative deepening, **principal variation search**, **null-move pruning**, **late move reductions** and **quiescence search**
- Added a **Zobrist-hashed transposition table** and move ordering by **MVV-LVA**, **killer moves** and the **history heuristic**; fixed a bug where transposition-table cutoffs hid **repetition draws**
- Trained a **781–512–256–128–1** evaluation network in **PyTorch** (sigmoid-scaled loss, **AdamW**, early stopping) with **incremental accumulators** for fast inference, tested in **cutechess** tournaments

Game Theory | *Learners' Space*
Maths and Physics Club, IIT Bombay

- Proved **Zermelo's theorem** for infinite-play "Long Chess", and by **induction** that each combinatorial-game position lies in exactly one outcome class $(\mathcal{L}, \mathcal{R}, \mathcal{N}, \mathcal{P})$; solved the blue-eyed islanders **common-knowledge** puzzle by induction
- Studied **iterated elimination** of dominated strategies, **maxmin** security levels, **mixed equilibria**, the **minimax theorem** and **Nash's theorem** via **Brouwer's fixed-point theorem**; used the **indifference principle** and solved zero-sum games as **LPs**
- Showed that in the n-player **volunteer's dilemma**, P(no one volunteers) $\to c/b$, not 0, as $n \to \infty$ (c: cost of volunteering, b: benefit if anyone does); analysed a lowest-unique-number **lottery game**; averaging **97.33%** marks on assignments

Other Projects

Reinforcement Learning for Algorithmic Trading | *Winter in Data Science*
Analytics Club, IIT Bombay

- Built a custom **trading environment** (buy/sell/hold, portfolio-value reward) and a tabular **Q-learning** agent with ε-greedy exploration, benchmarked against **buy-and-hold** and **moving-average crossover**
- Compared **greedy, ε-greedy and UCB** on multi-armed bandits; modelled Frozen Lake and other environments as **MDPs**

Mini Game Hub | *Course Project: Software Systems Lab (CS108)*

- Built a two-player hub in **Bash** and **Python/pygame** with three games, time controls and leaderboards
- Secured the **Bash login** against **injection** (raw input, whitelisted usernames), with **SHA-256** password hashing and lockout after three failures

Positions of Responsibility

- **Owner and maintainer** of an open-source course resource repository (past papers, reference books) used by **200 batchmates** and **freely available** to juniors and learners outside IIT Bombay *2026*
- Conducted a **mid-semester revision tutorial** for **Discrete Structures (CS105)** under the **Tutorial Services Centre**, creating **original practice problems** and resolving students' doubts *2026*

Technical Skills & Courses

Languages	C++, Python, Java, JavaScript, Bash, LaTeX
Tools	Git, NumPy, Pandas, Matplotlib, PyTorch, Z3 Solver
Courses	Computer Programming and Utilisation (CS101), Discrete Structures (CS105), Software Systems Lab (CS108)
Ongoing Courses	Data Analysis & Interpretation (CS215), Data Structures & Algorithms (CS213)†, Logic for Computer Science (CS228), Digital Logic Design & Computer Architecture (CS230)†

†*with corresponding lab (CS293, CS231)*
